

Benefits of Natural Stone

Benefits of Natural Stone over colored concrete

Natural Paving USA's calibrated hardscape products present home owners with the ultimate in durability and beauty with:

- > A vast choice of ethically sourced, luxury paving options.
- > Pre cut and packaged packs of natural stone that are calibrated to ease handling and installation.
- > A choice of installation techniques including set in mortar; thin-set or sand set.
- > Long lasting and low maintenance solution.

Such credentials make natural stone the natural choice over concrete and irregular stone paving alternatives.

Benefits of Natural Stone **over colored concrete pavers**

Natural Paving's stone landscaping products are more attractive than concrete paving equivalents:

- > Each piece of natural stone has a unique blend of color and tones which makes your garden / driveway / landscape, completely unique unlike manufactured colored concrete where all pieces are identical and comparatively characterless.
- > The color in natural stone is not pigmented unlike concrete, making it more attractive.
- > Natural stone will retain its look over time, as opposed to concrete which is manufactured from composite aggregate mixes that become exposed after a few years of trafficking.

Natural Paving's stone landscaping products are more durable than concrete paving equivalents:

- > Natural stone is a durable frost resistant paving.
- > Natural Stone does not wear, to expose aggregates like concrete does.

Natural Paving's stone landscaping products are easier to maintain than concrete paving equivalents:

- > Concrete requires ongoing maintenance and re painting, while Natural stone is easy to clean.

Natural Paving's stone landscaping products can be installed as easily as concrete paving equivalents:

- > The installation of natural stone does not require new skills; it can be laid similar to concrete.

Natural Paving's stone landscaping products are a better investment than concrete paving equivalents:

- > Using natural stone materials will add greater value to your property.
- > Natural stone does not necessarily cost more than using equivalent concrete products.

Natural Paving's stone landscaping products are more sustainable and environmentally friendly than concrete paving equivalents:

- > Natural Stone is the most sustainable building material, as resources of stone on earth are vast, plentiful and date back billions of years. Although the re-generation of stone is not as readily visible as the re-generation of trees, it is a continuous process with natural stone having an enduring life-cycle.
- > Natural stone is exactly that, natural, meaning that our stone products have not been 'manufactured' in the way that concrete equivalent products are.
- > As a natural product, our stone products are recyclable and can be used as reclaimed paving and/or crushed and used for aggregates.
